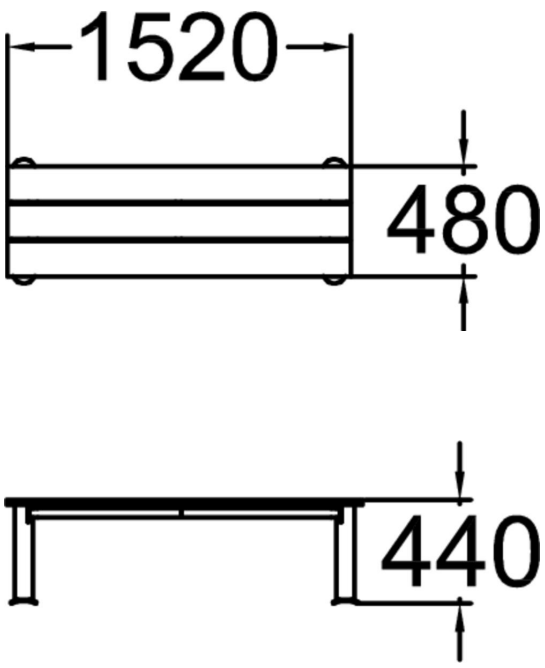
PARK FINNO LAMINATE BENCH without backrest

Lappset PARK benches are very popular because of their plain design, good sitting comfort and high quality materials. In Park Finno Laminate benches the seat material is the same High Pressure Laminate (HPL) as we use in our Playground equipment. HPL is very durable material in all weather conditions and it can also take hard hits without visible damages. You can choose the seat colour to match Lappset Finno playground equipment schemes; Lime Green, Apple Red, Tuttifrutti, Liquorice Grey and Candy Fuchsia. The bench is free standing and can be fixed to hard surface through feet holes or deep installed with ground anchor set 708106 with or without concrete.



Product length, mm	1520
Product width, mm	485
Product height, mm	440
