

Yalp Solar Interactives solar post is specifically developed to provide green energy for the Yalp Interactive playsets, without the need to prepare and install a mains power cable. **A new way to power.**

## Description

1. Completely black solar panel + no cables in view
2. Yalp y-shape, resembling a hand supporting the panel towards the sun. 90° adjustable
3. Stainless steel + color matching the interactive play equipment.
4. Battery foot. Offers stability to the posts and creates easy access for maintenance.

## Yalp Solar is developed explicitly for Yalp's interactive play equipment

## Interesting facts

What you should know

- + Yalp can calculate the Solar power at your location!
- + The amount of energy depends on three factors: weather, playing time & place.
- + The product must be installed outside the barricade-free zone of a playground.
- + Blendmark design blends into the environment, but stands out positively.

## Yalp interactives can be put in (energy saving) Eco Mode

In Eco Mode, the interactive will switch off during standby mode and switch on when the button is pressed.
